Ideas for Stations for the Nanotechnology

1. Comparison of items with sunscreen in them and how well they work to protect the consumer—using kit from the Nanotech workshop
2. Comparison of types of car wax and how the sun penetrates them—using kit from the nanotech workshop
3. Placing Agar in sodium hydroxide and the crossing of the membrane and how far the sodium hydroxide sinks in
4. Water resistant materials—rustoleum water proof spray and true water, stain repellant
5. Using thread and create a nanotech thread by layering the thread and demonstrating how hard the material gets
6. Videos on nanotechnology complete with questions
7. Quick research station on nanotechnology—websites and complete with questions
8. Interactive website on nanotechnology
